PROFILE

Graduate in Computer Science and Business Computing from University of Cape Town with a strong interest in Software Development Engineering. Hands-on experience with Java, Python, HTML, CSS, JavaScript, and Git through coursework and self-study. Worked with small development team to design, implement, and test software solution aligned with defined requirements using React and Django.

EDUCATION

University of Cape Town | Cape Town, SA **Feb 2021 – Dec 2025**
BSc. Computer Science and Business Computing (Information Systems)

- Relevant coursework: Java, Python, Data Structures & Algorithms, Databases (SQL), Systems Analysis & Design, Operating Systems, Networks

Ndamase SSS | Ngqeleni, SA **Jan 2018 – Dec 2020**
National Senior Certificate (NSC)

ADDITIONAL TRAINING

d-school Afrika* | University Of Cape Town **June 2025 – June 2025**
Design Thinking Week Programme

- Developed ability to work in multidisciplinary team to explore real-world challenges through the lens of powerful mindset and methodology that enables tackling problems with empathy, creativity and collaboration.

ACADEMIC EXPERIENCE

Course Engagement System **Aug 2025 – Sept 2025**

- Led a team of 3 developers to identify student engagement challenges and design a web platform that solved attendance and participation through geofencing, in-class quizzes, and analytics.
- Served as team leader and system architect; developed the login page and quiz functionality of the application.
- Used React, CSS, Django, managed version control with Git and GitHub. Repository

Mini BitTorrent System **Feb 2025 – Mar 2025**

- Collaborated in a team of 3 developers to design and implement a simplified BitTorrent simulation enabling simultaneous file distribution to multiple peers, improving understanding of distributed system efficiency and network utilisation.
- Tools and technologies: Python, Socket programming, Multithreading

Business Process Redesign **Aug 2024 – Oct 2024**

- Worked with a team of 6 members to define project scope, create a business case, and analyse ESEFA's "Annual Client Billing" business process using the BP Trends framework.
- Interviewed 4 stakeholders (including 1 client and process owner) to holistically view and document current workflows, identified 5 key process challenges, and proposed solutions for improved efficiency and clarity.
- Scoped business process identified problems and root causes, and redesigned process with visualised suggested operational and management reports to monitor performance.

IT Project Management **Feb 2024 – May 2024**

- Applied Project Management and Design Thinking to convert insights from at least 4 stakeholder interviews into 3 detailed visual infographics explaining Indigent Grants, RDP housing processes, and illegal eviction prevention steps for community members.
- Practiced leaderful teamwork within a team of 5 to achieve quality project within scope, time and budget.
- Defined business case, project charter, planning and delegated tasks to ensure quality project completion.

SKILLS

Programming:

- Programming languages: Java, Python, JavaScript (actively upskilling)
- Web Technologies: HTML, CSS, React (basic), Django (basic)
- Tools: Git, GitHub

Teamwork:

- Collaborated with multiple teams to contribute to successful various project outcomes.
- Participated in a multidisciplinary team during design thinking week programme to contribute to community solution.

Communication:

- Effectively shared my ideas with teams, interviewed project stakeholders and presented final solutions.

Problem solving:

- Applied agile methodologies, design thinking, and process thinking to identify issues challenging project stakeholders and developed solutions during project coursework.

Analytical:

- Designed dashboards for easy communication of the data to allow decision making.

Business Process Modelling:

- Modelled Business Process Model and Notion (BPMN) Diagram to describe and communicate AS-IS and TO-BE business processes.
- Gained foundational knowledge of Business Process Management (BPM) frameworks in INF3012S course.
