SUMMARY

Computer Science and Business Computing graduate from the University of Cape Town with practical experience building and deploying full-stack web applications. Experienced in developing frontend interfaces, backend services, REST APIs, authentication features and database-driven applications.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL

Frontend: React, HTML5, CSS3

Backend: Node.js, Express.js, Django, REST APIs

Databases: MongoDB, SQL

Tools: Git, GitHub, VS Code

Methodologies: Agile, Scrum, SDLC

EXPERIENCE

GreatStack - Tutorial-Based Project | Full-Stack Developer | Jul 2026 - Aug 2026

Tutorial-Based Personal Project - Car Rental System | [Live Demo](#)

- Built a full-stack car rental platform using the MERN stack.
- Developed frontend interfaces and backend REST API functionality for users, cars, and bookings.
- Integrated MongoDB with the Node.js/Express backend for persistent application data.
- Implemented authentication and protected application functionality using backend middleware.
- Integrated ImageKit for image uploads and image optimisation.
- Deployed the frontend on Vercel and backend on Render.
- Used Git and GitHub for version control and project management.

University of Cape Town | Full-Stack Developer | Aug 2025 - Sept 2025

Course Capstone Project - Course Engagement System | [Live Demo](#)

- Led a team of 3 developers in identifying student engagement challenges and designing a web platform supporting attendance and participation through geofencing, in-class quizzes and analytics.
- Contributed to the system architecture and developed the authentication/login and quiz functionality.
- Worked with React, CSS and Django and managed source code using Git and GitHub.
- Deployed the application using Vercel and Render.

ESEFA - University of Cape Town | Team Member | Aug 2024 - Oct 2024

Course Project - Business Process Redesign (BPMN)

- Worked with a team of 6 members to define project scope, create a business case, and analyse ESEFA's "Annual Client Billing" business process using the BP Trends framework.
- Interviewed 4 stakeholders (including 1 client and process owner) to holistically view and document current workflows, identified 5 key process challenges, and proposed solutions for improved efficiency and clarity.
- Scoped business process identified problems and root causes, and redesigned process with visualised suggested operational and management reports to monitor performance.

UCT Knowledge CO-OP | Team Member | Feb 2024 - May 2024

Course Project - IT Project Management

- Collaborated with the Knowledge Co-op and Housing Assembly to apply Project Management and Design Thinking methodologies, translating insights from four stakeholder interviews into three user-friendly visual infographics covering Indigent Grants, RDP housing applications, and illegal eviction prevention for community education.
 - Practiced leaderful teamwork within a team of 5 to achieve quality project within scope, time and budget.
 - Defined business case, project charter, planning and delegated tasks to ensure quality project completion.
-

EDUCATION

University of Cape Town | Cape Town, SA | Feb 2021 - Dec 2025

BSc. Computer Science and Business Computing

- Relevant coursework: Java, Python, Data Structures & Algorithms, Databases (SQL), Systems Analysis & Design, Operating Systems, Networks, IT PM

Ndamase SSS | Ngqeleni, SA | Jan 2018 - Dec 2020

National Senior Certificate (NSC)
